

# HSENI VIDEO LIST

<b>Code</b>	<b>Title and Description</b>
<b>V1</b>	<p><b>Game Over</b></p> <p>Every year children are injured and killed as a result of construction activities. The purpose of this video is to keep children off building sites. It is aimed at 7-11 year olds. Run time: 9 minutes</p>
<b>V2</b>	<p><b>High Designs</b></p> <p>Design of safe access and places for work at height during maintenance operations. This video shows how those who design structures not only influence the safety of those who build them but also those who are involved in maintenance activities. Run time: 24 minutes</p>
<b>V3</b>	<p><b>The Maysfield Disaster</b></p> <p>Run time: 30 minutes</p>
<b>V4</b>	<p><b>Asbestos Poisoning (Yorkshire Television video)</b></p> <p>Describes danger to health of exposure to all types of asbestos. Run time: 25 minutes</p>
<b>V5</b>	<p><b>Power Presses (Parts 1&amp;2)</b></p> <p>Part 1 of this video introduces the basic components of power presses, in particular the flywheel, clutch and brake. Part 2 deals with the safeguarding of these machines. Run time: 40 minutes</p>
<b>V6</b>	<p><b>Working Safely at Containment Level 3</b></p> <p>When working with Hazard Group 3 biological agents it is essential that the most suitable containment measures are used. This video demonstrates the physical requirements of the CL3 laboratory and also provides guidance on the procedural controls required to ensure safe working practice. Run time: 15 minutes</p>
<b>V7</b>	<p><b>Thrills Not Spills</b></p> <p>A guide to the ergonomics of passenger containment on amusement rides. Run time: 17 minutes</p>
<b>V8</b>	<p><b>John Davies Factory Inspector</b></p> <p>A Factory Inspector is shown: investigating a forklift truck accident and visiting the injured girl in hospital; discussing a chemical company's development plans and recommending improved safety measures at an engineering works; prohibiting work in a disorganised upholstery factory; storing potentially toxic materials and a construction site where the scaffolding is unprotected; conducting a court case against a foundry and inspecting a fairground ride. Run time: 25 minutes</p>
<b>V9</b>	<p><b>Calculated Risk</b></p> <p>A video showing the work of the Health and Safety Executive on the assessment of major industrial hazards. Run time: 19 minutes</p>

# HSENI VIDEO LIST

<b>V10</b>	<p><b>One Moment Please</b></p> <p>A film on industrial accidents suitable for the staff of any company, whatever its size or business. Its simple theme is that most accidents are unnecessary. Run time: 10 minutes</p>
<b>V11</b>	<p><b>Using Work Equipment</b></p> <p>Run time: 16 minutes</p>
<b>V12</b>	<p><b>The Management of Ear Protection</b></p> <p>This video is aimed at those providing ear protection and illustrates the care necessary in the selection, use and maintenance of these devices if they are to provide the required protection against loss of hearing. Run time: 13 minutes</p>
<b>V13</b>	<p><b>Safety Matters</b></p> <p>This video is aimed at small businesses and shows a company where an accident puts a key employee out of action. It is produced for people who influence businesses and suggests that health and safety is an important area that every small business should consider.</p>
<b>V14</b>	<p><b>Too Much Trouble</b></p> <p>This video illustrates how tragedy can strike on the simplest of tasks - the type of job where too often it is just too much trouble to take the necessary safety precautions and looks at some of the wide range of access equipment now available. Run time: 20 minutes</p>
<b>V15</b>	<p><b>Exercise Traction</b></p> <p>This video shows an emergency evacuation exercise at a new Birmingham Hospital. The exercise dramatically highlighted a number of serious problems in the hospitals fire procedure. The total evacuation time was 38 minutes - some 18 minutes longer than had been anticipated. Run time: 20 minutes</p>
<b>V16</b>	<p><b>PES - Safety and Computer Control</b></p> <p>Programmable Electronic Systems in Safety Related Applications. Run time: 17 minutes</p>
<b>V17</b>	<p><b>Whose Risk is it Anyway?</b></p> <p>This video shows how a systematic common sense approach to health and safety hazards in the workplace could not only save lives, but also help small firms comply with new legislation and stay in business. Run time: 17 minutes</p>

# HSENT VIDEO LIST

<b>V18A</b>	<p><b>Shock Horror</b></p> <p>Every year people working in agriculture die as a result of accidents with overhead power lines. This video aims to make young farm workers aware of the danger from overhead power lines by reconstructing events that lead to accidents and offering advice on how to avoid them. A burns specialist explains the consequences of accidents and victims talk about their experiences. Run time: 10 minutes</p>
<b>V18B</b>	<p><b>Shock Horror</b></p> <p>Please see description above</p>
<b>V19</b>	<p><b>The Key Position</b></p> <p>This video for employees aims to develop awareness of the possible hazards associated with the use of display screen equipment and show basic techniques to adopt in order to minimise such risks. Run time: 8 minutes</p>
<b>V20</b>	<p><b>Safe Stations</b></p> <p>This video aims to develop awareness about management responsibilities under the Health and Safety (Display Screen Equipment) Regulations 1992 and provides practical help with putting these requirements into practice. Run time: 18 minutes</p>
<b>V21</b>	<p><b>It Won't Happen To Me</b></p> <p>This video deals with health and safety awareness for users of personal protective equipment. It highlights the reasons for PPE and explains how correct use can help to reduce the risk of injury. Run time: 12 minutes</p>
<b>V22</b>	<p><b>Live Wires</b></p> <p>This video looks at aspects of maintaining portable electrical equipment used at work. It shows how the inspection system could operate and gives typical examples of what to look for. The video can be used to help train the staff who will carry out the regular inspections. Run time: 12 minutes</p>
<b>V23</b>	<p><b>Dangerous Playground</b></p> <p>Deals with the day-to-day hazards children face on a farm. Run time: 13 minutes</p>
<b>V24</b>	<p><b>Matter of Life and Breath</b></p> <p>This video graphically illustrates the debilitating effect on people's lives of asthma caused by breathing in substances used in the workplace. It advises you how to protect your employees from developing occupational asthma. Run time: 15 minutes</p>

# HSE VIDEO LIST

<p><b>V25</b></p>	<p><b>A Sharp Reminder</b></p> <p>This video is designed to trigger discussion about hand safety in the workplace and at home. It stresses that most serious hand injuries are preventable and that all accidents must be taken seriously. Damage to nerves, blood vessels and tendons should never be under-estimated. Run time: 18 minutes</p>
<p><b>V26</b></p>	<p><b>Make Health Your Business</b></p> <p>This programme emphasises that keeping your workforce healthy makes good business sense. It offers guidance to help you keep your business healthy and forms part of HSE's "Good Health is Good Business" campaign. Run time: 16 minutes</p>
<p><b>V27</b></p>	<p><b>Health and Safety for Computer Operators - The Facts</b></p> <p>Presented by Selina Scott this video completes with VDU Workstation Checklist Assessment sheets. Run time: 12 minutes</p>
<p><b>V28</b></p>	<p><b>Five Steps to Risk Assessment (with subtitles)</b></p> <p>This is a general risk assessment video designed for those whose hearing is impaired. Run time: 8 minutes</p>
<p><b>V29</b></p>	<p><b>Best Signs Story</b></p> <p>Making use of animation, this video provides an introduction to the range of health and safety signs and symbols which are to be found in the workplace. Run time: 13 minutes</p>
<p><b>V30</b></p>	<p><b>Signposts for Health and Safety Part 2 - Electrical Safety</b></p> <p>Looks at assessing risks in a variety of workplaces and at electrical safety. Discusses the effects of European Law on health and safety. It highlights the importance of good housekeeping and looks at preventing fires and explosions. Discusses the need for a health and safety policy, especially for split site employment. Run time: 60 minutes</p>
<p><b>V31</b></p>	<p><b>Signposts for Health and Safety Part 4 - First Aid at Work</b></p> <p>Includes advice on first-aid at work and on reporting accidents; also looks at safe workplace transport. It looks at protecting the public and insurance, also safety in the office. Run time: 60 minutes</p>
<p><b>V32</b></p>	<p><b>Motor Vehicle Repair</b></p> <p>This video introduces the principles of safe work for those in motor vehicle repair, particularly those involved in draining petrol tanks and moving and working underneath vehicles often involve both inadequate equipment and poor systems of work. Run time: 17 minutes</p>

# HSENI VIDEO LIST

<p><b>V33</b></p>	<p><b>Bright Sparks</b></p> <p>This video recreates 4 accidents caused by the use of fishing rods, kites, and CB aerials near overhead electric lines and children entering electrical sub stations. Run time: 8<sup>1/2</sup> minutes.</p>
<p><b>V34</b></p>	<p><b>Computers and You</b></p> <p>This video illustrates how computers themselves may not pose a threat to anybody's health, however if they are used incorrectly this can cause problems. The way we sit and the way we look at computers is directly linked to the science of ergonomics. This video highlights the ergonomics of computer safety. Run time: 15 minutes</p>
<p><b>V35</b></p>	<p><b>First Aid - The Facts</b></p> <p>This video is presented by Selina Scott and looks at issues such as danger, response, checking airways, breathing and circulation. All vital elements for essential training to prepare organisations for emergency situations should they arise in the workplace. First Aid training will help prevent injuries from getting worse and also help promote recovery. Run time: 30 minutes</p>
<p><b>V36</b></p>	<p><b>Electrical Safety - The Facts</b></p> <p>This video looks at the responsibility of the Safety Officer to understand the requirements and implications of the legislation and to assist employees to meet the obligations that such legislation imposes upon them. This video also covers issues such as the prevention and control of electrical hazards. Run time: 30 minutes</p>
<p><b>V37</b></p>	<p><b>Safe Use of Printing Chemicals</b></p> <p>A guidance video for COSHH assessment using case studies at three commercial printers. The video uses practical examples to show how printers can comply with COSHH. Run time: 18 minutes</p>
<p><b>V38</b></p>	<p><b>Staying Healthy</b></p> <p>This video is a guide to occupational health issues for people who work in agriculture and horticulture. Ill health related to work is a major cause for concern with over 50,000 cases reported each year. Run time: 24 minutes</p>
<p><b>V39</b></p>	<p><b>Microbiological risks when working with sewage and sludge</b></p> <p>Workers in a number of industries are at risk from contact with sewage. This video shows the risks presented by a number of different work activities. It illustrates the appropriate use of control measures such as personal protective equipment, good hygiene practices and training needs for workers.</p>
<p><b>V40</b></p>	<p><b>Fire Safety in Catering Kitchens</b></p> <p>This video aims to help reduce workplace loss or injury resulting from fires in catering kitchens and to make them much safer places for those who work in them. Run time: 16 minutes</p>

# HSE VIDEO LIST

<b>V41</b>	<b>Lifeboat On-Load Release Gear</b>  Safe inspection and maintenance. Lives have been lost in the North Sea, in accidents associated with lifeboat on-load release gear. Investigations have shown that these accidents occurred during or directly after inspection or maintenance. The common element appears to be human error, not mechanical failure. This raises concerns about the training and experience necessary to perform such work safely. HSE has therefore produced this video to act as a 'refresher' for anyone who has to maintain and inspect lifeboats. Run time: 22 minutes
<b>V42</b>	<b>The Way Ahead - HSE 25th Anniversary</b>  This video show the significant events which have shaped our decision making and made the HSC/E what it is today. Run time: 26 minutes
<b>V43</b>	<b>Handling Rubber</b>  This video shows what five different companies have done to reduce or eliminate handling risk. The case studies include the handling of press tools, process materials, tyre casings and finished goods. Run time: 18 minutes
<b>V44A</b>	<b>Power 2 Shock</b>  This video recreates 4 accidents caused by machinery or equipment coming into contact with overhead lines or underground cables. The avoidance of these accidents may be achieved by adopting the guidance given in this video. The four accident scenes depicted are mini pillar/vandalism, elevated platform, tree cutting and mini digger.
<b>V44B</b>	<b>Power 2 Shock</b>  Please see description above
<b>V45</b>	<b>It Couldn't Happen to Me - the danger of underground services</b>  Run time: 20 minutes
<b>V46</b>	<b>Karting - a guide to safe circuit operation</b>  With the growth of indoor and outdoor karting centres, almost everyone can enjoy the excitement of motor sport but it can also be dangerous. This video highlights the most common areas of risk at karting circuits and suggest ways in which these risks can be controlled. Run time: 23 minutes
<b>V47</b>	<b>Heather &amp; James go to Court - An introduction to Sheriff Court procedures in Scotland</b>  The video shows a fictitious prosecution in the Sherriff' court resulting from an accident and the evidence gathered during the subsequent investigation. Run time: 28 minutes

# HSENI VIDEO LIST

<p><b>V48</b></p>	<p><b>Get A Grip - health &amp; safety at indoor climbing walls</b></p> <p>Indoor climbing is an increasingly popular sport for people of all ages and abilities. This video covers all aspects of indoor climbing, from the equipment used to different types of wall, and also describes key aspects of health and safety management. Run time: 38 minutes</p>
<p><b>V49</b></p>	<p><b>Stop Slips - managing slips to reduce injuries &amp; costs</b></p> <p>The video shows managers and safety professionals managing slips risk in practice in the workplace. It also describes a slips risk assessment model along with the hierarchy of slips control measures. The technical considerations for the measurement and selection of floor materials are also reviewed. Run time: 35 minutes</p>
<p><b>V50</b></p>	<p><b>The Heat Within - the effect of fire in pressurised tunnels</b></p> <p>This video shows how compressed air and an added oxygen content will act on various materials commonly found in tunnels. It emphasises how important it is to prevent fires starting, wear correct personal protective equipment, and maintain good standards of housekeeping and site safety practice. Run time: 26 minutes</p>
<p><b>V51</b></p>	<p><b>One Wrong Move - a manager's story</b></p> <p>Run time: 11 minutes</p>
<p><b>V52</b></p>	<p><b>DTI Safety Messages for in and around the home</b></p> <p>Home safety Run time: 16 minutes</p>
<p><b>V53</b></p>	<p><b>Rash Decisions Offshore</b></p> <p>Work-related dermatitis affects many people in all sorts of industries – hairdressing, construction, catering, cleaning, engineering, printing and horticulture, to name but a few. The good news is that this suffering and financial loss are preventable. This video demonstrates that managing the risks makes good business sense and prevents unnecessary suffering. Run time: 12 minutes</p>
<p><b>V54</b></p>	<p><b>One Careful Owner</b></p> <p>Dangers in the metal recycling industry. This video looks at the metal recycling industry. It covers issues such as machinery guarding, workplace transport, crane safety, exposure to lead, PCBs and radioactive contamination. Run time: 23 minutes</p>
<p><b>V55</b></p>	<p><b>To Cap It All</b></p> <p>The capping of stranded wire ropes with polyester resin. There have been a number of incidents in recent years involving the failure of resin-socketed wire rope terminations on cables that were being used for mooring offshore vessels. This video identifies the main factors that affect the integrity of resin-socketed terminations and demonstrates procedures for ensuring that good terminations are produced.</p>

# HSE VIDEO LIST

<b>V56</b>	<p><b>Out In Control</b></p> <p>Advice for people on work experience schemes. Out – In control follows the progress of Robert as he encounters potentially dangerous situations on a mixed farm and traces his development as he learns to adapt to work surroundings. Although the video uses farming examples, it will be relevant to any students about to start work experience. Run time: 22 minutes</p>
<b>V57</b>	<p><b>What The Papers Weigh</b></p> <p>A training video for all those who routinely handle newspaper and magazine bundles, looking at safe manual handling practice using computer graphics and actual work activity. It gives practical advice on ways to reduce the risk of injury at the various stages of the distribution chain and will be of interest to publishers, distribution contractors, wholesalers, newsagents and other retailers. It contains details of an industry agreement to limit bundle weight to an agreed maximum. Run time: 18 minutes</p>
<b>V58</b>	<p><b>3 Steps To Safety</b></p> <p>Within the ship build and repair industry there are many hazards that can seriously affect the health and safety of workers ranging from slips, trips and falls to suffocation, fire and explosion. This video highlights these and other hazards while encouraging a joint approach to health and safety between all workers and their management. Run time: 25 minutes</p>
<b>V59A</b>	<p><b>Safe Driving on Slopes</b></p> <p>This video training guide will inform and instruct people working in agriculture about the dangers and safe methods of driving farm vehicles and machinery on slopes as this can be a major cause of injuries and fatalities. Run time: 19 minutes</p>
<b>V59B</b>	<p><b>Safe Driving on Slopes</b></p> <p>Please see description above</p>
<b>V60</b>	<p><b>Good Health is Good Business - satellite conference</b></p> <p>On 12 March 1998 in London, as part of the UK's Presidency of the European Union the Health and Safety Executive (HSE) organised a major satellite-linked international conference on occupational health. Run time: 2 hours</p>
<b>V61</b>	<p><b>Control of Exothermic Chemical Reactions</b></p> <p>This video was made as part of a training package for Health and Safety Executive Inspectors who visit chemical plants. It is likely to be of assistance to those in industry or academic institutions that are involved with the training of personnel who will work in, operate or design chemical process plant.</p>
<b>V62</b>	<p><b>Safety &amp; Health at Work in Practice: Turn your back on musculoskeletal disorders</b></p> <p>All over Europe there is a growing understanding that safety and health issues are a key consideration for creating a good working environment. A new resource is now available, the comprehensive website of the European Agency for Safety and Health at Work. Organisations can visit this 'one stop shop' and find practical solutions to many of their occupational safety and health problems.</p>

# HSENI VIDEO LIST

# HSENI VIDEO LIST

<b>V63</b>	<p><b>Back on the Farm - farm lifting solutions</b></p> <p>Back on the farm looks at practical solutions to some common manual handling problems on farms. It shows how the use of manual handling aids, tools and techniques can reduce the risk of back injury.</p>
<b>V64</b>	<p><b>Diver Emergency Surface Location Devices</b></p> <p>The trials were held over a four month winter period in Orkney and Shetland to give the widest variation of light, sea and wind conditions Run time: 16 minutes</p>
<b>V65</b>	<p><b>Work Related Upper Limb Disorder</b></p> <p>Run time: 13 minutes</p>
<b>V66</b>	<p><b>Microbiological Safety Cabinets: safe working practices</b></p> <p>This video provides information about the performance criteria for Microbiological Safety Cabinets and offers practical advice on their safe use. Run time: 13 minutes</p>
<b>V67</b>	<p><b>The Pressure's on - managing stress at work</b></p> <p>Reorganisation, downsizing, technological developments – many organisations are going through a period of rapid change. Research suggests that ongoing change is a source of considerable pressure for individuals within an organisation. This video training package will help identify sources of pressure and their impact, to select and use appropriate short-term coping techniques and to develop long-term resilience to stress. Run time: 38 minutes</p>
<b>V68</b>	<p><b>Manual Handling (Hospitals and Nursing Homes)</b></p> <p>Manual Handling in nursing homes and hospitals can be very different from offices and general work environments. The video highlights the importance of making risk / task assessments and recognising and dealing with potentially hazardous manual handling operations and unfamiliar operations and situations. Run time: 20 minutes</p>
<b>V60</b>	<p><b>A Head for Heights - Guidance for working at height in construction</b></p> <p>Falls from heights are the biggest cause of fatalities and serious accidents in the construction industry. This dramatic video contains reconstructions of a range of scenarios to show the causes, results and impacts of serious accidents in the workplace. It offers practical advice and guidance on how to avoid high-risk situations, the correct use of equipment, risk assessment, and risk management. Run time: 25 minutes</p>
<b>V70</b>	<p><b>Home Is Where the Harm Is - RoSPA NI</b></p> <p>A training package to raise awareness and promote safe behaviour in your home.</p>
<b>V71</b>	<p><b>Wise - Be Safe - Choosing child safety equipment</b></p>

# HSE VIDEO LIST

<b>V72</b>	<p><b>Trading Standards Service - Working with business</b></p> <p>Encouraging responsible business, promoting a fair trading environment, providing advice and assistance.</p>
<b>V73</b>	<p><b>Stress in the Workplace - The facts</b></p> <p>Presented by Kathy Tayler, this video tackles work-related stress and advises on how to improve and maintain employee health and well-being. Run time: 15 minutes</p>
<b>V74A</b>	<p><b>How Are You Managing - Dealing with the risk of asbestos in buildings</b></p> <p>Part one of this DVD provides a hard-hitting portrayal of the final days in the life of a building worker suffering from mesothelioma. It graphically demonstrates the potential outcome for those who are unknowingly being exposed to asbestos fibres in their day-to-day work. The key message is the importance of checking whether material contains asbestos before starting work. Part two shows how a duty holder might address the requirements of the duty to manage asbestos in non-domestic premises from the perspective of a large and a small organisation.</p> <p>Run time: 28 minutes</p>
<b>V74B</b>	<p><b>How Are You Managing - Dealing with the risk of asbestos in buildings</b></p> <p>See description above</p>
<b>V75</b>	<p><b>Height Safe - Safe working at height</b></p> <p>Each year falls from height kill or seriously injure workers from across a wide range of industries. This video will give all workers who may be at risk a stark warning of the consequences of falling from height. It offers guidance and advice on safe working practices and will be of value to anyone who works at height or is responsible for those that do.</p>
<b>V76</b>	<p><b>No Second Chances – farm machinery safety</b></p> <p>Every year farm workers are injured and killed in accidents involving machinery. This video looks at the potentially fatal consequences of ignoring safe working practices. Run time: 13 minutes.</p>
<b>V77</b>	<p><b>Risk Assessment – The Facts</b></p> <p>Presented by Selina Scott. A guide to conducting a risk assessment. Remember if you employ 5 or more people you must carry out a written Risk Assessment of all work processes. Run time:12 minutes</p>
<b>V78</b>	<p><b>Slips, Trips and Falls – The Facts</b></p> <p>Presented by Selina Scott. This training video highlights the importance of preventing slips and trips hazards in the workplace to help your company reduce the risk of injury. Over a third of all reported accidents are caused by slips and trips. Run time: 20 minutes</p>
