

Particulars to be provided in a notification under regulation 6(3)

HSENI require the following information to be given in a notification for work with ionising radiation:

- a. The name and address of the employer and a contact telephone or fax number or electronic mail address;
- b. The address of the premises where or from where the work activity is to be carried out and a telephone or fax or electronic mail address at the premises;
- c. The nature of the business of the employer;
- d. State which category the source(s) of ionising radiation fall into:-
 - i. sealed source;
 - ii. unsealed radioactive substance;
 - iii. electrical equipment;
 - iv. an atmosphere containing the short-lived daughters of radon
- e. Whether or not any source is to be used at premises other than the address given in paragraph b above
- f. Dates of notification and commencement of the work activity.

The following information should be available on request and is of assistance to HSENI if it is forwarded at this stage:

- A brief description of the work intended to be undertaken with ionising radiation
- Particulars of the source(s) of ionising radiation including the type of electrical equipment used or the nature of any radioactive substance.
- Name of Radiation Protection Adviser.

For further information on any of the above please contact our Headquarters at:
